CURRICULUM VITAE
BRIAN MURITHI

Cell: +254 706 134 387 **Email:** murithibrianm@gmail.com

POSITIONING STATEMENT:

I am a passionate, energetic, ambitious, and well-informed **software development, web developer, and database management professional.** Software development is my passion. I developed the interest right from high school and I continued to build on this passion up to the University level where I pursued a **Bachelor of Computer Science.** Additionally I have competency in **Data Entry, Microsoft Software usage, IT Technical Support, Design and Project documentation as well as Computer Software Usage.**

I am always eager to go beyond my expectations. I have undertaken various professional development programs that have branded me ahead of my peers. I possess greater problem-solving skills by using **modern programming technologies.** This includes **JavaScript, React.js, Node.js (Express); Database –Firebase, SQL, and MongoDB**. I am also familiar with and experienced in Typescript, Bash, Next.js, and WordPress

I have unmatched proficiency in **Microsoft Office and google docs.** Specifically, I have a wealth of experience and knowledge in using office applications including excel, outlook, word, publisher, PowerPoint, google sheets, slides, and Microsoft Office 365 development tools. Also great at managing databases such as Microsoft Access and preparations of documents and presentations of reports.

I advocate for The Fourth Industrial Revolution. I am progressively developing my skills to align with the dynamic changes and emerging trends to influence society technologically, a champion for organization-set objectives as well as growing my career. When looking for a reliable computer scientist with a strong technical background, crowned with excellent client service, accuracy, efficiency, and innovation then count on me. An upcoming tech brain for the future in Africa then count on me.

I look forward to engaging with you as an employee or partner as we grow together.
